

Everest Loss Control Services

OUR PEOPLE

Everest's Loss Control Specialists are insurance professionals, specifically trained and experienced in risk management and dedicated to reduce the cost of risk for the insured's while delivering quality services you expect and demand.

Insured's have given our Loss Control service high marks for quality, responsiveness, and results. Our experience transcends a wide array of areas including: environmental abatement practices, risk transfer techniques, toxicology, air quality, job site assessments and environmental loss prevention.

OUR METHODS

Our goal is to identify the root causes of claims and then recommend loss prevention solutions such as enhanced work quality controls, effective risk transfer methods, improved pre-job assessments and job-site controls. These solutions may also have the added benefits of sustained insurability, competitive premiums, and reduced operating expenses. Solutions that positively impact the bottom line results for the insured.

Everest Loss Control services are managed by a Certified Industrial Hygienist & Certified Safety Professional with 30+ years of Loss Control experience, including managing environmental abatement projects. Our Loss Control Specialists employ a "loss focused" approach, meaning they will work closely with the insured to review their exposures to loss, existing claims, loss trends and potential loss sources.

Loss focused recommendations would be developed following a risk assessment of the insured's operations, then monitored to assure implementation. In some instances, a service plan, including service objectives may be developed jointly with the insured. The service plan focuses on existing and potential loss sources and incorporate measurable risk improvement goals so progress can be monitored.

All service activities with loss control recommendations are communicated to all parties involved. When needed, we provide account coordination services to ensure an established plan is implemented efficiently for our larger, multi-location insured's.

OUR SERVICES

At www.everestnational.com we provide pertinent safety information, publications and links that can enhance an insured's loss prevention programs, support training activities and help our insureds stay current on recent risk management developments.
